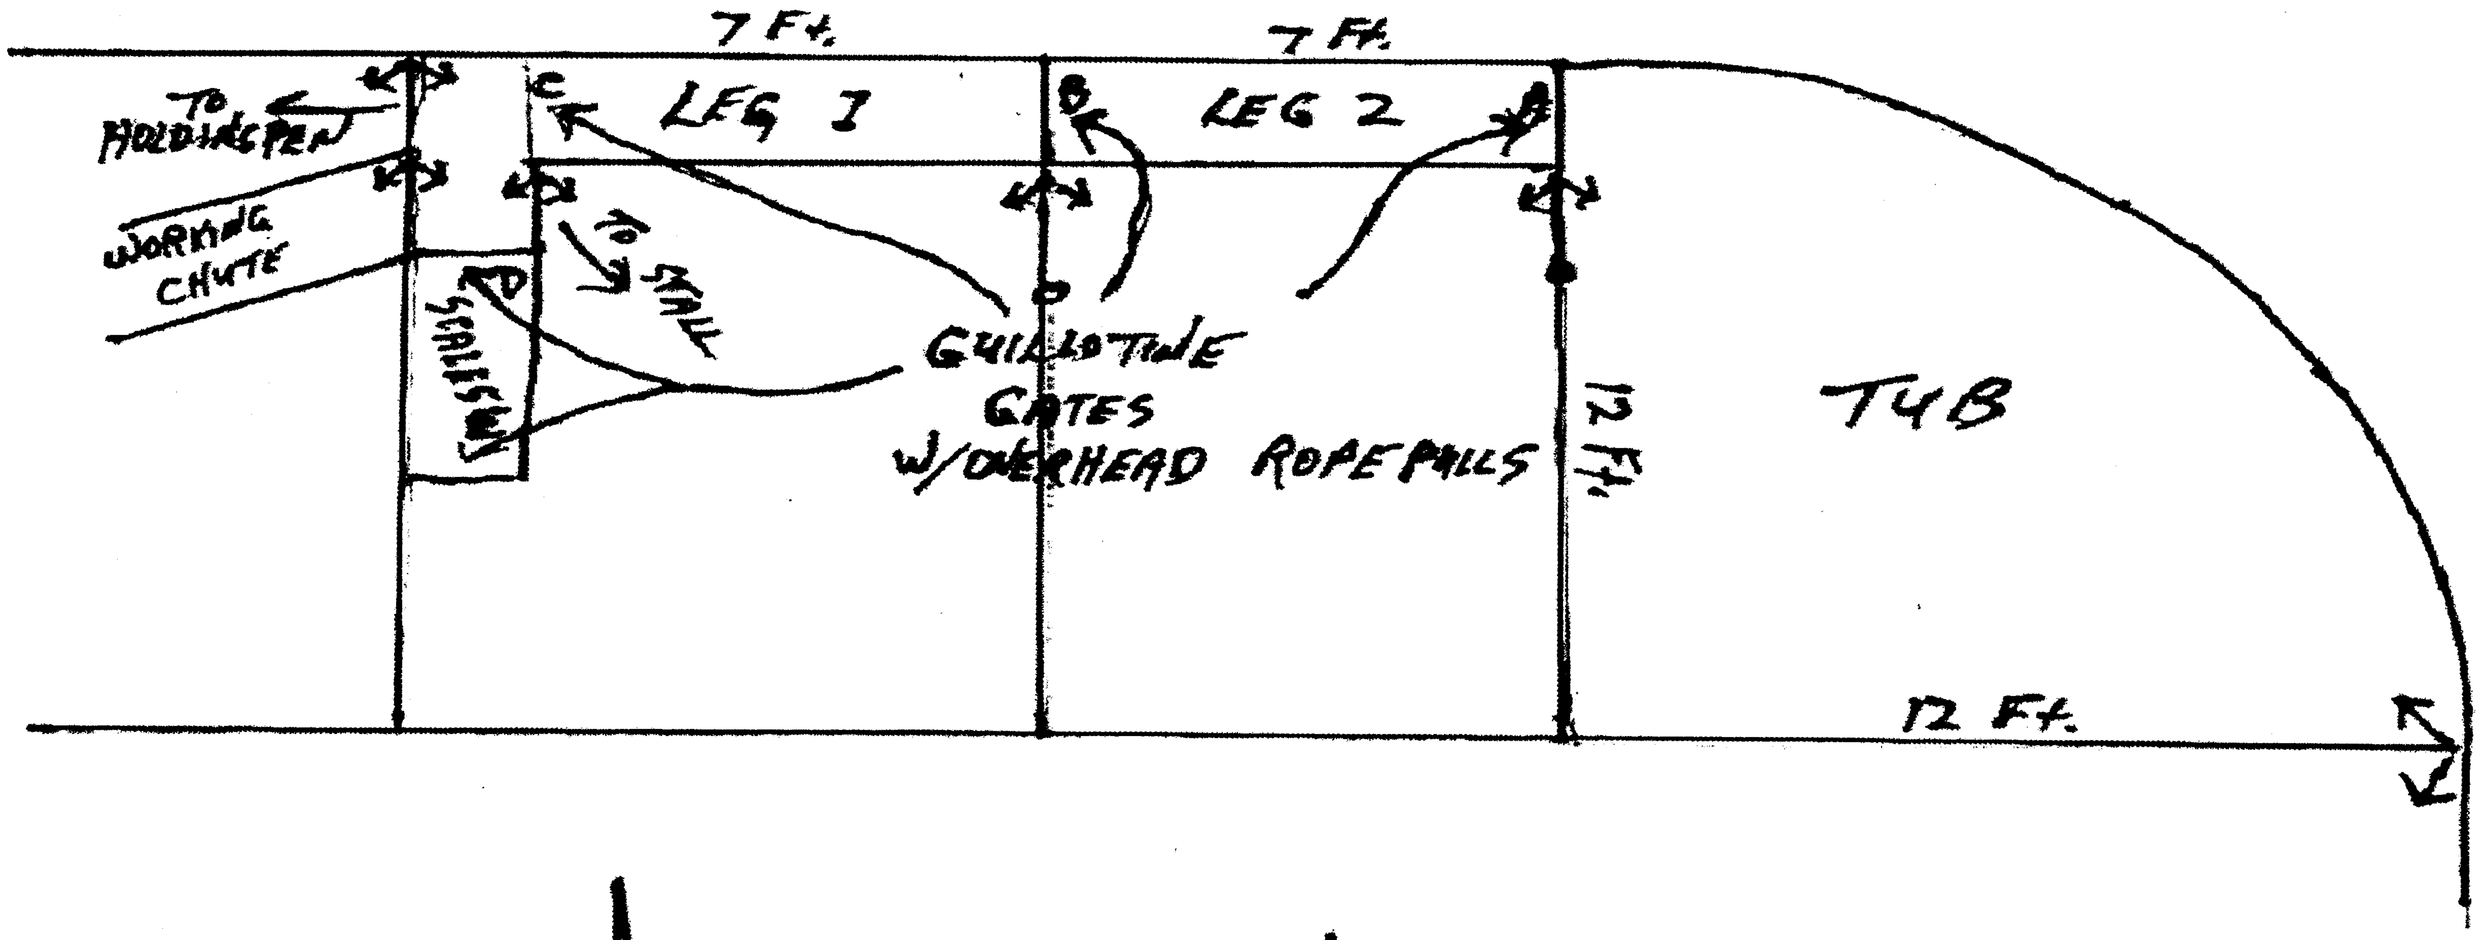
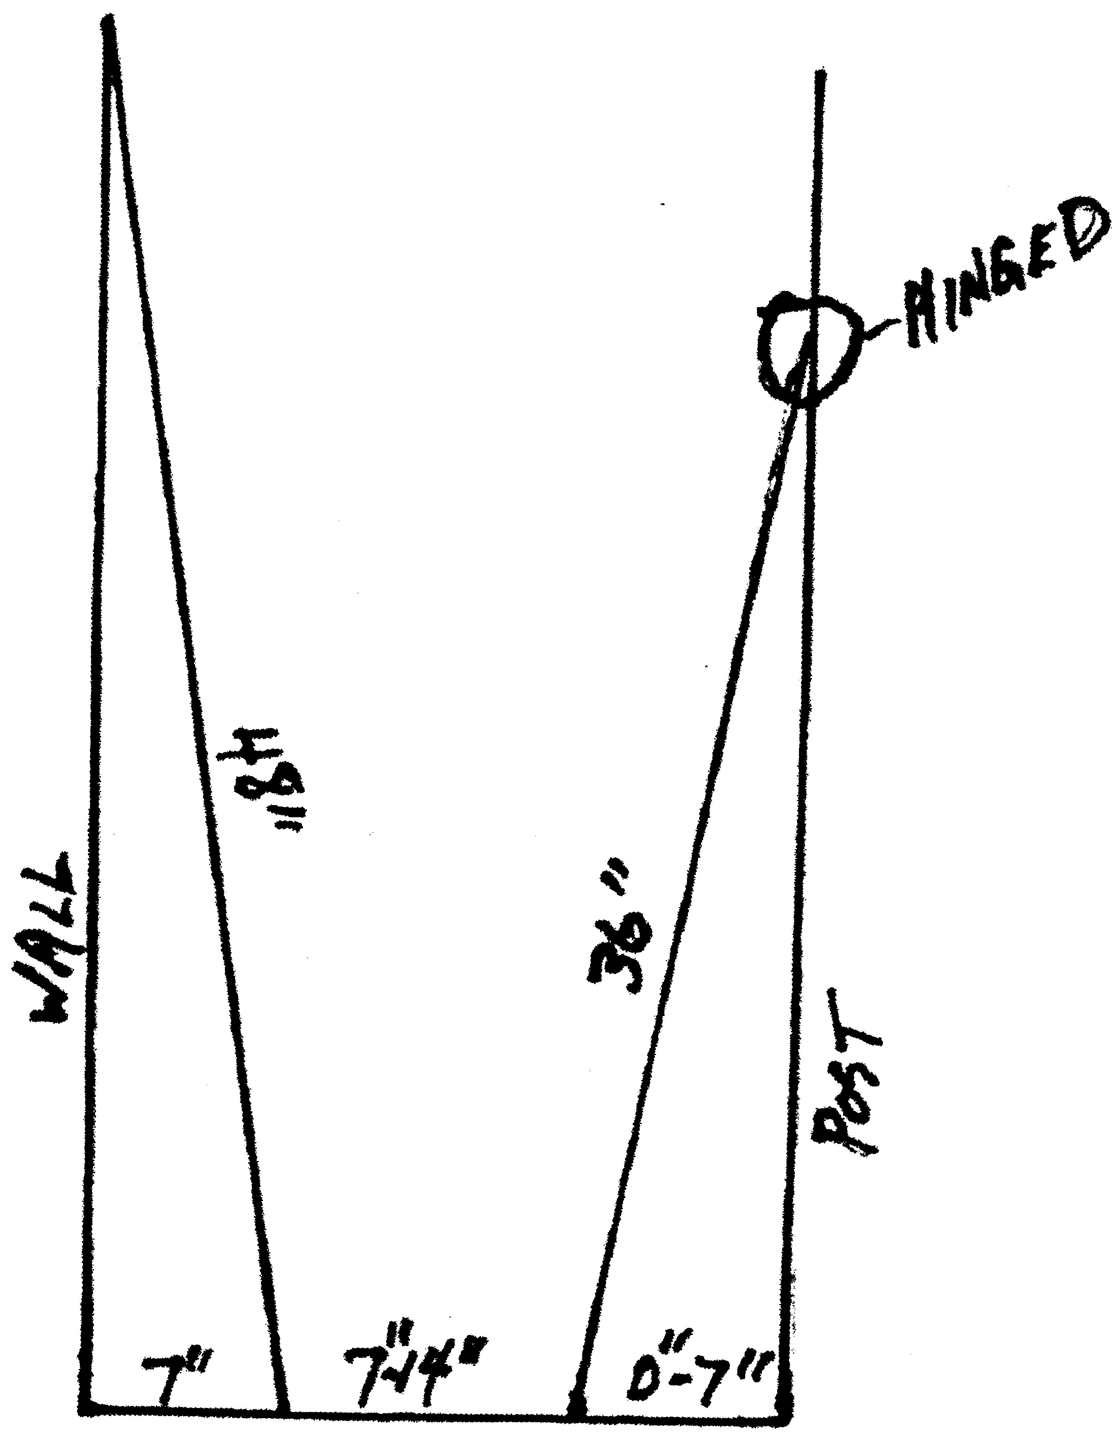
Overhead view of crowding tub, eye checking legs, and gates
Scale 1/4 in = 1 ft



End view of adjustable eye checking leg.

Scale
1 in=1 ft.



1. Helper in tub opens Gate A and loads three to four goats into leg 2. Rope pull is tied to back side of tub allowing gate to be opened without getting in front of the goats.

2. Gate B is opened and goats rolled forward into leg 1 where operator checks eye scores and/or gives vaccines while helper refills leg 2.

3. Operator sets sorting gates and opens Gate C. Helper opens Gate B with rope tied to alley and back goats follow departing goats into leg 1.
