Acknowledgments

We would like to thank the College of Agriculture at Oklahoma State University for their cooperation and the specific research information they provided for this publication. In addition, we would like to thank Kathryn Metheny for her dedication and hard work on the project.

The Kerr Center is a nonprofit foundation headquartered in Poteau, Oklahoma. The Center is named for Robert S. Kerr (1896-1963) former Oklahoma Governor and U.S. Senator known for his conservation work.

For over thirty years, the name Kerr has been associated with progressive ideas in agriculture. From 1965-1985, the agricultural division of the nonprofit Kerr Foundation provided ranchers in southeastern Oklahoma with technical assistance and information.

In the mid-80's Foundation trustees recognized that Oklahoma agriculture was in crisis. Environmental and financial problems on the farm needed to be addressed with fresh ideas that emphasized long-term solutions. The Kerr Center for Sustainable Agriculture was established in 1986. It was the first organization in Oklahoma to devote all of its resources to working for a fair, profitable, environmentally-sound agriculture. The Center has continued the work of its predecessor.

The Center's Public Policy and Rural Development Program was established in 1996. The program assists rural citizens and decision makers by sharing information about strong sustainable communities and the consequences of proposed policies for rural communities and agriculture.

This report can be accessed through the Kerr Center web site www.kerrcenter.com. The document can only be reproduced with written permission from the Kerr Center.
